Mohammad Nur Casib

Mohammad Nur Gumaos Casib (born June 9, 2006, Cagayan de Oro City), known by the nickname *Iman*, is a Filipino-Meranaw STEM scholar widely recognized as one of the most accomplished student competitors in Philippine academic history.<ref name="minda2025">Arguillas, Carolyn O. "Moro Whiz Kid in Math, Physics, Chemistry and Statistics Off to MIT for College." *MindaNews*, March 2025. https://mindanews.com/top-stories/2025/03/moro-whiz-kid-in-math-physics-chemistry-and-statistics-off-to-mit-for-college/</ref> A product of the Philippine Science High School – Central Mindanao Campus (PSHS-CMC), he has accumulated medals across six distinct scientific disciplines—mathematics, physics, chemistry, statistics, astronomy/astrophysics, and nuclear science—at both national and international levels.<ref name="dostpost">Reyes, Renante. "The Rise of Pisay Prodigy: Mohammad Nur Casib's Historic Journey in STEM." *DOST S&T Post*, 2025. http://sntpost.dost.gov.ph/dost/the-rise-of-pisay-prodigy-mohamad-nur-casibs-historic-journey-in-stem</ref> He holds several historic firsts for the Philippines and the Bangsamoro Autonomous Region in Muslim Mindanao (BARMM): the first Filipino to win gold at the International Olympiad on Astronomy and Astrophysics (IOAA); the first Philippine student to be named Nuclear Ambassador at the inaugural International Nuclear Science Olympiad (INSO); and the first Bangsamoro, as well as the first student from PSHS-Central Mindanao Campus, to be admitted to the Massachusetts Institute of Technology (MIT).<ref name="manstd">Manila Standard Staff. Early Life

Mohammad Nur Gumaos Casib was born in Cagayan de Oro City but grew up in Marawi City, Lanao del Sur, the provincial capital of the predominantly Meranaw heartland of mainland Mindanao. He is the eldest of four children in a household of distinguished medical professionals: his father, Dr. Norodin S. Casib, is a general surgeon, and his mother, Dr. Sittienor M. Gumaos-Casib, is an obstetrics-gynecologist; both serve at the Amai Pakpak Medical Center, the primary government hospital in Marawi City.<ref name="minda2025"/> His parents noted a pronounced aptitude for numbers from his earliest years, describing a child for whom quantitative reasoning came naturally and with evident pleasure.<ref name="dostpost"/>

The formative period of his childhood was dramatically altered by the 2017 Marawi Siege, a five-month military conflict between Philippine government forces and Islamist militants of the Maute Group and Abu Sayyaf, which resulted in the near-total destruction of Marawi's central districts and the displacement of an estimated 360,000 residents.<ref name="minda_nuclear">Arguillas, Carolyn O. "Moro Student Wins Gold in 1st Int'l Nuclear Science Olympiad; Is Hailed as 'Nuclear Ambassador'." *MindaNews*, August 10, 2024. https://mindanews.com/top-stories/2024/08/moro-student-wins-gold-in-1st-intl-nuclear-science-olympiad-is-hailed-as-nuclear-ambassador/</ref> The Casib family was among the displaced. In the shadow of the siege, where adversity sought to confine him, Nur Casib instead broke free—discovered himself and unleashed brilliance that would echo his name in the portals of greatness. An eventual return to Marawi City in January 2019, following a period of resettlement, coincided with Casib's emergence on the national competition circuit.<ref name="minda_nuclear"/> His parents have emphasized that the disruption of the siege, while traumatic, indirectly expanded his educational horizon by accelerating the family's engagement with specialized schooling opportunities outside the conflict zone.

Mohammad Nur Casib

Personal Information	
Full name	Mohammad Nur Gumaos Casib
Nickname	"Iman"
Born	c. 2006 Marawi City, Lanao del Sur, Philippines
Nationality	Filipino
Ethnicity	Meranaw (Maranao)
Religion	Islam
Parents	Dr. Norodin Casib (father) Dr. Sittienor M. Gumaos-Casib (mother)
Education	
Secondary	Philippine Science High School – Central Mindanao Campus (PSHS-CMC), Balo-i, Lanao del Norte (Class of 2025)
University	Massachusetts Institute of Technology (MIT), Class of 2029 *Double Major: Artificial*

Early Competition Record

Casib's competitive career began when he was grade 5 in My Precious Child Learning Center in Marawi City. In his upper primary years from 2018-2019, he qualified to represent the country in three (3) international mathematics competitions through the Mathematics Trainers' Guild (MTG)-Philippines, a highly renowned center specialized to train students for different academic circles most especially Mathematics. In 2018, he won a gold medal at the 15th International Mathematics and Science Olympiad (IMSO) held in Zhuji City, Zhejiang Province, China, and a bronze medal at the 21st Po Leung Kuk Primary Mathematics World Contest (PMWC) in Hong Kong.<ref name="minda_nuclear"/>. In August 2019, he clenched a silver medal at the South Africa International Mathematics Competition (SAIMC) in Durban, South Africa. In April 2019, few months prior to South Africa's math tilt, he was the National Champion in the prestigious grade 6 Metrobank-MTAP-DepEd Mathematics Challenge (MMC)-individual category, publicly stating at the time that his goal was "to bring the banner of the Bangsamoro region to the competition."<ref name="minda_nuclear"/> During the covid pandemic, he continued to qualify in several high-ground international math tilts conducted online winning gold in the 25th Junior Balkan Mathematical Olympiad & silver in the Indonesia International Mathematics Competition all in 2021. The following year in 2022, he won another gold in one of China's hardest math competition, the China North Mathematical Olympiad. These early achievements established the scope and character of what would become a record-breaking scholastic career.

	Intelligence and Chemistry; Minor: Physics
Notable Distinctions	
Known for	First Bangsamoro admitted to MIT; First Filipino gold medalist at IOAA; First-ever International Nuclear Science Olympiad "Nuclear Ambassador"
Personal motto	*Plus Ultra* (Further Beyond)
Selected Awards	
International	Gold – 17th IOAA (2024); Gold – 1st INSO (2024); Gold – 36th APMO (2024); Bronze – IMO (2022, 2023); Silver – 57th IChO (2025)
National	Overall Champion – 27th PMO (2025); Absolute Winner & Gold – PPO (2025); MVP – 24th National Statistical Challenge (2025)
Legislative recognition	Philippine Senate Resolution No. 214; Bangsamoro Parliament Resolution No. 485

Education

Philippine Science High School – Central Mindanao Campus

Casib enrolled at the Philippine Science High School – Central Mindanao Campus (PSHS-CMC), located in Balo-i, Lanao del Norte, a specialized secondary institution under the Department of Science and Technology (DOST).<ref name="manstd"/> The PSHS system, commonly known as "Pisay," operates a national network of campuses with a mandate to identify and cultivate talent in the sciences and mathematics, preparing scholars for both national Olympiad teams and international competition.<ref name="dostpost"/> The CMC, one of the regional campuses, admitted Casib as part of its highly selective intake, where students are assessed through a rigorous national competitive examination.

Within the PSHS-CMC, Casib distinguished himself not only through his academic record but also through an extraordinary breadth of competitive participation. Where most Pisay scholars concentrate on one or two disciplines, Casib competed—and excelled—simultaneously across mathematics, physics, chemistry, statistics, astronomy and astrophysics, and nuclear science, a feat described by faculty and competition administrators as without precedent in the system's history.<ref name="dostpost"/> His training for international Olympiads involved

extended periods in Metro Manila, where he studied under specialists at the University of the Philippines Diliman Institute of Mathematics, the Ateneo de Manila University's Philippine Institute of Pure and Applied Chemistry, the PSHS Main Campus, and the PAGASA Observatory.<ref name="barmm2024"/>

Massachusetts Institute of Technology

On March 14, 2025—coinciding with International Pi Day—Casib accessed his online admissions portal and confirmed acceptance to the Massachusetts Institute of Technology (MIT) in Cambridge, Massachusetts, as a member of the MIT Class of 2029.<ref name="minda2025"/> The formal notification letter, dated March 18, 2025, was signed by Stuart Schmill, MIT's Dean of Admissions and Student Financial Services, who stated that Casib "stood out as one of the most talented and promising students in an incredibly competitive applicant pool."<ref name="mindanao2025">Arguillas, Carolyn O. "MINDANAO 2025: Mindanawon Students Shine in Yale, MIT, Leuven and International Competitions." *MindaNews*, January 6, 2026. https://mindanews.com/top-stories/2026/01/mindanao-2025-mindanawon-students-shine-in-yale-mit-leuven-and-international-competitions/</ref>

He is the first student from PSHS-CMC, and the first known individual from the Bangsamoro Autonomous Region in Muslim Mindanao (BARMM), to enter MIT at the undergraduate level.<ref name="minda2025"/> He was awarded a full scholarship and is pursuing a double major in Artificial Intelligence and Chemistry, with a minor in Physics—a combination that positions him at the intersection of computational science and molecular engineering.<ref name="mindanao2025"/>

Career and Competitive Achievements

Mathematics

Philippine Mathematical Olympiad

The Philippine Mathematical Olympiad (PMO) is the national qualifying examination for the Philippine team to the International Mathematical Olympiad (IMO). Casib competed in the PMO from 2023 through 2025, showing a consistent upward trajectory: he placed First Runner-up at the 25th PMO in 2023; Second Runner-up at the 26th PMO in 2024; and Overall Champion at the 27th PMO, held at Far Eastern University in Manila on March 8–9, 2025, where he bested a field that included multiple IMO veterans.<ref name="minda2025"/>

International Mathematical Olympiad

Casib represented the Philippines at the International Mathematical Olympiad (IMO) on three occasions. At the 63rd IMO held in Oslo, Norway, in 2022, he won a bronze medal.<ref name="ph63imo">Philippine Graphic Staff. "PH Wins 2 Bronzes, 4 Honorable Mentions at 63rd International Mathematical Olympiad." *Philippine Graphic*, July 27, 2022. https://philippinesgraphic.com.ph/2022/07/27/ph-wins-2-bronzes-4-honorable-mentions-at-63rd-international-mathematical-olympiad/</ref> At the 64th IMO in Chiba, Japan, in 2023, he again secured a bronze medal, making him the first Bangsamoro student to receive multiple IMO distinctions.<ref name="minda_nuclear"/> At the 65th IMO in Bath, United Kingdom, in July 2024, he received an Honorable Mention.<ref name="mb65imo">Manila Bulletin Staff. "Filipino Students Win at 65th International Mathematical Olympiad in UK." *Manila Bulletin*, July 20, 2024. https://mb.com.ph/2024/7/20/filipino-students-win-at-65th-international-mathematical-olympiad-in-uk</ref>

Asian Pacific Mathematics Olympiad

Casib won a silver medal at the 35th Asian Pacific Mathematics Olympiad (APMO) in 2023.<ref name="minda_nuclear"/> In 2024, he secured a gold medal at the 36th APMO—only the fourth gold medal the Philippines had ever won in the competition's history, representing a landmark achievement for Philippine mathematics on the regional stage.<ref name="dostpost"/>

Statistics

In February 2025, Casib led the PSHS-CMC team to the championship of the 24th National Statistical Challenge, held at the University of the Philippines Diliman School of Statistics. Beyond the team victory, he was personally awarded the competition's inaugural Most Valuable Pearson (MVP) distinction—a title created specifically to recognize the individual with the highest score on the written examination—the first time in the competition's history that such an individual award was conferred.<ref name="minda2025"/>. They were the defending champion after winning the the 23rd National Statistical Challenge in 2024.

Physics

At the 2025 Philippine Physics Olympiad (PPO), held at the University of the Philippines Los Baños on March 15–16, 2025, Casib was declared the "Absolute Winner and Gold Medalist," a designation indicating the single highest individual score among all participants nationwide—a distinction that separates the top scorer from the broader cohort of gold medalists.<ref name="minda2025"/><ref name="pshs_ppo">Philippine Science High School. "Pisay Pride in Math & Physics!" *PSHS Official Website*, 2025. https://pshs.edu.ph/pisay-pride-in-math-physics/</ref>

Astronomy and Astrophysics

The International Olympiad on Astronomy and Astrophysics (IOAA) tests mastery of theoretical astrophysics, observational astronomy, complex data analysis, and practical night-sky navigation. Casib's IOAA career constitutes two consecutive historic milestones for the Philippines.

At the 16th IOAA in Poland in August 2023, he won a silver medal—the first medal of any kind the Philippines had received in the competition since the country began participating in 2010.<ref name="luwaran_nuclear">Luwaran Staff. "Moro Student Hailed as 'Nuclear Ambassador' in Olympiad Held in New Clark City." *Luwaran*, August 2024. https://www.luwaran.com/news/article/2738/moro-student-hailed-as----nuclear-ambassador----in-olympiad-held-in-new-clark-city</ref>

At the 17th IOAA held in Rio de Janeiro, Brazil, from August 17–27, 2024, he surpassed that achievement by winning the country's first-ever gold medal at the competition—in an event that drew participants from over fifty countries.<ref name="barmm2024"/> The Philippine Senate formally recognized this achievement through the adoption of Senate Resolution No. 214, commending Casib for elevating the Philippines' standing in the international academic community.<ref name="senres214">Senate of the Philippines. *Resolution No. 214: Commending Mohammad Nur Casib for Winning the First-Ever Gold Medal for the Philippines at the 17th International Olympiad on Astronomy and Astrophysics.* 19th Congress. https://legacy.senate.gov.ph/19th_congress/resolutions/resno214.pdf</ref> His achievement was additionally recognized by the Philippine government through a separate commendatory document from the Office of the President.<ref name="senph4">Senate of the Philippines. *Resolution from the 19th Congress.* https://legacy.senate.gov.ph/lisdata/4517541056!.pdf</ref>

IOAA Competitive Progression

Year	Edition	Host Country	Medal / Result
2023	16th IOAA	Poland	Silver (First Philippine IOAA medal)
2024	17th IOAA	Brazil (Rio de Janeiro)	Gold (First Philippine IOAA gold)

Nuclear Science

The inaugural International Nuclear Science Olympiad (INSO) was held at New Clark City, Pampanga, from August 1–6, 2024, organized by the Philippine Nuclear Science Institute in collaboration with the DOST, DepEd, and the National Research Council of the Philippines, with support from the International Atomic Energy Agency (IAEA).<ref name="iaea_inso">International Atomic Energy Agency. "First Ever International Nuclear Science Olympiad Held in Run Up to International Youth Day." *IAEA Newscenter*, August 2024. https://www.iaea.org/newscenter/news/first-ever-international-nuclear-science-olympiad-held-in-run-up-to-international-youth-day</ref> The competition drew 55 participants from 14 countries across the Asia-Pacific region and assessed mastery of topics ranging from atomic structure and radiation physics to nuclear medicine and environmental radioactivity, over examinations totaling 8.5 hours.<ref name="minda_nuclear"/>

Among all 55 competitors, Casib achieved the highest aggregate score in both the theoretical and experimental components of the competition, winning a gold medal and the top-scorer award for the written examination.<ref name="rappler_inso">Rappler Staff. "Filipino Students Win 2 Golds, 1 Silver at International Nuclear Science Competition." *Rappler*, August 9, 2024. https://www.rappler.com/bulletin-board/contests-awards/filipino-students-win-golds-silver-medals-international-nuclear-science-competition-august-2024/</ref> On the basis of this performance, he was conferred the title of "Nuclear Science Olympiad Ambassador" for the 2024–2025 period—an honorary designation created for the inaugural edition of the competition to recognize its highest-achieving participant—tasked with promoting nuclear science education and mentoring future INSO competitors.<ref name="minda_nuclear"/><ref name="pshs_inso">Philippine Science High School. "PSHS Celebrates Gold and Silver Victories at 1st International Nuclear Science Olympiad." *PSHS Official Website*, 2024. https://pshs.edu.ph/</ref>

Chemistry

International Chemistry Olympiad

Casib represented the Philippines at the International Chemistry Olympiad (IChO) twice. At the 55th IChO held in Zurich, Switzerland, in 2023, he won a bronze medal.<ref name="barmmp_zurich">Parliament of the Bangsamoro Autonomous Region in Muslim Mindanao. *Resolution Congratulating Mohammad Nur Guma-os Casib for Winning the Bronze Medal in the International Chemistry Olympiad Held in Zurich, Switzerland.* https://parliament.bangsamoro.gov.ph/adopted-resolution/resolution-congratulating-mohammad-nur-guma-os-casib-a-native-of-lanao-del-sur-for-winning-the-bronze-medal-in-the-international-chemistry-olympiad-held-in-zurich-switzerland-thereby-giving-pride/</ref>

At the 57th IChO held in Dubai, United Arab Emirates, in July 2025, he won a silver medal—the highest-scoring silver for the Philippines at that edition and the fourth silver the country had ever won in the IChO's history, with reports noting his score fell remarkably close to the threshold for a gold medal.<ref name="pshs_icho25">Philippine Science High School. "Mabuhay, Team Philippines! 1 Silver and 3 Bronze Medals for PH at the 2025 International Chemistry Olympiad." *PSHS Official Website*, July 2025. https://pshs.edu.ph/mabuhay-team-philippines/</ref><ref name="filipinotimes">Filipino Times Staff. "Filipino

Scholars Bag 4 Medals at International Chemistry Olympiad in Dubai." *Filipino Times*, July 16, 2025. https://filipinotimes.net/latest-news/2025/07/16/filipino-scholars-bag-4-medals-at-international-chemistry-olympiad-in-dubai/</ref>

National Chemistry Olympiad

In March 2025, coinciding with the national competition season, Casib and his PSHS-CMC teammates won gold at the 24th Philippine National Chemistry Olympiad (PNCO), held at the University of the Philippines Manila College of Arts and Sciences on March 22.<ref name="minda2025"/> Gold awardees at the PNCO earn eligibility to represent the Philippines at the IChO, consistent with the pathway he subsequently fulfilled at the 57th IChO in Dubai.

Chemistry Achievement Summary

Year	Competition	Host / Venue	Medal / Result
2023	55th IChO	Zurich, Switzerland	Bronze
2025	24th PNCO	UP Manila	Gold (Team)
2025	57th IChO	Dubai, UAE	Silver (Highest-scoring silver, PH)

Historic Significance

Mohammad Nur Casib's career carries significance at multiple intersecting levels—national, regional, and cultural.

Within the Philippine educational system, he is the first known student to have simultaneously held the titles of National Statistical Champion MVP, Physics Olympiad Absolute Winner, and Mathematics Olympiad Overall Champion within a single calendar year (2025), constituting what observers have described as an unprecedented "Triple Crown" or, more expansively, a "Sextuple Crown" when accounting for his concurrent national-level chemistry and earlier international achievements.<ref name="dostpost"/>

Within the PSHS system, he is the first student from the Central Mindanao Campus to be admitted to MIT and the first in the system's history to have competed at the highest international level across six distinct disciplines simultaneously.<ref name="minda2025"/>

For the Philippines in the specific arena of astronomy and astrophysics, his 2024 IOAA gold is the country's first in fourteen years of IOAA participation—a milestone formally recognized by the Senate of the Philippines.<ref name="senres214"/>

Within the Bangsamoro Autonomous Region in Muslim Mindanao (BARMM), Casib is celebrated as the first Bangsamoro individual to have achieved admission to MIT, the first Moro student to win multiple IMO distinctions, and a cultural reference point for what his community's institutions of governance have termed a "New Moro" identity grounded in scientific excellence.<ref name="barmm2024"/>

Public Reception

Casib's achievements have generated formal institutional recognition at multiple levels of Philippine governance.

The Philippine Senate adopted Resolution No. 214 commending him for his gold medal at the 17th IOAA in 2024.<ref name="senres214"/> A second Senate resolution further recognized his broader contributions to Philippine STEM.<ref name="senph4"/>

The Bangsamoro Parliament (formerly the Bangsamoro Transition Authority) has adopted multiple resolutions in his honor. Resolution No. 389 congratulated him upon winning the bronze medal at the 55th IChO in Zurich.<ref name="barmmp_zurich"/> Resolution No. 485, adopted in August 2024, specifically recognized his gold medal and Nuclear Ambassador designation at the inaugural INSO, with parliamentary members framing his achievements as a "collective triumph" for the Bangsamoro people rather than merely an individual accomplishment.<ref name="barmmp_inso">Parliament of the Bangsamoro Autonomous Region in Muslim Mindanao. *Resolution No. 485: Resolution Congratulating and Commending the 1st International Nuclear Science Olympiad Gold Medalist and Highest Scorer Awardee and Named Nuclear Ambassador, Mohammad Nur Casib, of PSHS-CMC.* https://parliament.bangsamoro.gov.ph/adopted-resolution/resolution-congratulating-and-commending-the-1st-international-nuclear-science-olympiad-gold-medalist-and-highest-scorer-awardee-and-named-nuclear-ambassador-mohammad-nur-casib-of-philippine-science-h/</ref>

Regional political figures, including former Maguindanao Governor and Representative Esmael "Toto" Mangudadatu, publicly commended Casib's achievements on social media as models of Bangsamoro youth aspiration.<ref name="rappler_inso"/> The Bangsamoro Youth Commission (BYC) similarly issued a statement declaring that his accomplishments "inspire fellow Bangsamoro youths."<ref name="barmm2024"/>

Civil society and media coverage across the Philippine archipelago—from national broadsheets including the *Manila Bulletin* and *Manila Standard* to the Mindanao-based analytical outlet *MindaNews*—consistently framed his story within a counter-narrative to the historical association of the Bangsamoro region with conflict and political instability, emphasizing instead the region's capacity for educational excellence when supported by appropriate institutional infrastructure.<ref name="manstd"/><ref name="dostpost"/>

Contributions

Beyond his own competitive record, Casib's most durable structural contribution to Philippine STEM is his role as the inaugural Nuclear Science Olympiad Ambassador. In this capacity, conferred for the 2024–2025 period, he is formally tasked with promoting nuclear science literacy among secondary students across the Asia-Pacific region, mentoring candidates preparing for future editions of the INSO, and serving as a public face for the IAEA's educational outreach initiatives in the Philippines.<ref name="minda_nuclear"/><ref name="iaea_inso"/> This role is directly relevant to the Philippines' current national discussions around nuclear energy as a potential component of the country's long-term energy transition strategy.

His choice of academic concentration at MIT—a double major in Artificial Intelligence and Chemistry with a minor in Physics—positions him for eventual contributions in computational chemistry, a discipline with significant applications in pharmaceutical design, materials science, and sustainable development. His training under multiple national and international academic specialists, alongside sustained engagement with the PSHS mentorship network, has prepared him for advanced research in these intersecting domains.<ref name="mindanao2025"/>

Legacy

Casib has materially altered the narrative frameworks through which the Bangsamoro region, the PSHS-CMC, and Filipino youth from Mindanao are discussed within both domestic and international educational contexts. Before his career, no student from BARMM had held multiple medals at the IMO; no Filipino had ever won gold at the

IOAA; and no student from the PSHS-CMC had entered MIT.

Within Marawi City—a community still in active reconstruction following the 2017 siege—Casib's trajectory serves as a tangible demonstration that conditions of displacement and material deprivation are not determinative of intellectual potential when institutional support is adequate and familial investment in education is sustained.<ref name="minda_nuclear"/> His story has been used by DOST and PSHS administrators as a model for expanding STEM scholarship access to underrepresented regions, particularly Mindanao and the Bangsamoro.<ref name="dostpost"/>

His personal motto, *Plus Ultra* (from the Latin: "Further Beyond"), reflects a philosophy of continuous self-overcoming that has resonated widely as a public message for younger students across the Philippines and the BARMM in particular.

Personal Life

Casib is a practicing Muslim and identifies strongly with his Meranaw cultural heritage. He frequently attributes his academic achievements to divine will, regularly employing Islamic phrases of gratitude—*Tabarakallah* (blessed be God) and *Alhamdulillah* (praise be to God)—in public communications and post-competition statements.<ref name="minda2025"/>

A notable episode illustrating the intersection of his faith practice and competitive life occurred during the 2025 national competition season, which coincided with the Islamic month of Ramadan. Casib competed across multiple Olympiads—including the 27th PMO, the PPO, and the PNCO—while observing the Ramadan fast. His father described the period as "very tough," noting that Nur managed disrupted sleep schedules and reduced caloric intake while simultaneously performing at peak level across disciplines.<ref name="minda2025"/>

On the morning of March 15, 2025—the day of the PPO—he accessed his MIT admissions portal before the competition began, having decided that the certainty of a result, whether favorable or unfavorable, would allow him greater mental composure than waiting. He has publicly noted that the combination of faith in his preparation and trust in a higher power enabled him to proceed with the competition regardless of outcome.<ref name="minda2025"/>

He lives with his family in Marawi City and Balo-i, Lanao del Norte. As of early 2026, he is enrolled at MIT in Cambridge, Massachusetts.<ref name="mindanao2025"/>
