Sohaili L. Laguindab

Dr. Sohaili L. Laguindab is a Filipino Muslim physician and interventional cardiologist based in Marawi City, known for his role in expanding access to advanced heart care in the Bangsamoro Autonomous Region in Muslim Mindanao (BARMM). He is closely associated with the development of the Amai Pakpak Medical Center (APMC) Heart Institute, where he has been involved in life-saving cardiac procedures and institutional capacity building. His work reflects a broader legacy, bringing specialized cardiovascular care closer to underserved communities in Lanao del Sur and nearby provinces.

Dr. Sohaili L. Laguindab

Profession	Cardiologist, Interventional Cardiologist
Institution	Amai Pakpak Medical Center
Field	Cardiology, Internal medicine
Religion	Islam

Background

Publicly available records on Dr. Laguindab's early life remain limited, including details about his birthplace, family background, and formative years. This gap is not uncommon among physicians whose careers are primarily documented through institutional and clinical work rather than personal biography.

What emerges instead is a professional identity rooted in service to community-based healthcare in Mindanao, particularly in Marawi City, a place shaped by both resilience and recovery.

Education

Available records suggest that Dr. Laguindab pursued his medical education at Xavier University – Ateneo de Cagayan, specifically through the Jose Rizal School of Medicine.

A preserved academic citation links his name to a 2008 undergraduate medical thesis involving environmental and public health research on fecal contamination in the Cagayan de Oro River.<ref name="xu_thesis">Archived undergraduate thesis citation, Xavier University, 2008.</ref>

A separate board examination listing places “Sohaili Laguindab” among examinees associated with Xavier University during the August 2011 physician licensure examination cycle.<ref name="board_exam">Physician Licensure Examination Room Assignment List, August 2011.</ref>

Further training in interventional cardiology is associated with the Philippine Heart Center, where he reportedly completed advanced specialization prior to returning to Marawi.<ref name="apmc_tpi">Amai Pakpak Medical Center, Heart Institute milestone report.</ref>

Career

Dr. Laguindab serves as a cardiologist and interventional cardiologist at Amai Pakpak Medical Center, the main government tertiary hospital in Marawi City.

His clinical work includes procedures such as coronary angiography, angioplasty, hemodynamic studies, and pacemaker insertion, all of which are critical interventions in managing cardiovascular disease.<ref name="mb_heart">Amai Pakpak Medical Center Heart Institute opening report.</ref>

He has been identified as one of the key physicians involved in the establishment and operationalization of the APMC Heart Institute, alongside other specialists, marking a major step in decentralizing advanced cardiac care in Mindanao.

One institutional milestone connected to his work was the successful performance of the hospital’s first temporary pacemaker insertion, following his return from specialized training.<ref name="apmc_tpi" />

Contributions

Dr. Laguindab’s contributions go beyond individual patient care and extend into system-level improvements in healthcare delivery.

He has participated in accreditation efforts with PhilHealth in the BARMM region, particularly for Z-benefit packages covering congenital heart diseases such as Tetralogy of Fallot and Ventricular Septal Defect.<ref name="philhealth">APMC–PhilHealth BARMM accreditation engagement report.</ref>

He has also been involved in emergency cardiac interventions, including primary percutaneous coronary intervention (PCI), often under urgent and high-risk conditions.

Community-based accounts and institutional posts frequently describe him as a physician directly involved in life-saving procedures, reinforcing his reputation among patients and colleagues.

Public Health Advocacy

Dr. Laguindab has taken part in community education initiatives, particularly those focused on cardiovascular emergency response.

During a World Heart Day event at Mindanao State University, he helped lead hands-only CPR training sessions for students and community members.<ref name="msu_event">Mindanao State University World Heart Day 2025 report.</ref>

> “Cardiac arrests often occur at home, making it crucial for everyone to learn CPR.”

This reflects a consistent theme in his work, empowering communities with practical life-saving knowledge.

Legacy

Dr. Laguindab's legacy is closely tied to the localization of advanced medical care in the Bangsamoro region.

For decades, patients in Lanao del Sur and surrounding areas often had to travel long distances to access specialized cardiac procedures. The emergence of interventional cardiology services at APMC represents a shift, allowing patients to receive timely care closer to home.

His role in this transition positions him as part of a broader movement, strengthening regional healthcare systems in historically underserved areas.

Recognition

While formal national awards or distinctions are not extensively documented in publicly accessible sources, Dr. Laguindab has received strong recognition at the institutional and community level.

He is frequently described in hospital and community narratives as a dedicated physician and "lifesaver," reflecting the trust placed in him by patients and colleagues.

Challenges

Practicing interventional cardiology in Marawi City comes with structural challenges.

These include limited resources, the need for continuous training and equipment upgrades, and the broader context of healthcare delivery in a post-conflict region.

Despite these constraints, the expansion of cardiac services at APMC highlights ongoing progress in overcoming these barriers.

Death

As of available public records, there is no verified information indicating that Dr. Sohaili L. Laguindab is deceased.
