Raslany Mambuay

Engr. Raslany Mambuay, REE, CEM, CEA, SO2, PCO, LFA, is a distinguished Filipino electrical engineer, civic leader, and emerging legal professional whose career exemplifies the convergence of technical excellence, transformative leadership, and public service commitment. As the first Muslim president of the Rotaract Club of Manila Metro and recipient of the Overall Most Outstanding President award in District 3810, he has demonstrated exceptional capacity to lead diverse organizations toward measurable impact while breaking barriers for Maranao representation in professional and civic spaces. With credentials spanning electrical engineering, energy management, environmental compliance, safety, and financial advisory—combined with ongoing legal education—Mambuay represents a new generation of Filipino professionals integrating technical expertise with governance and public policy.

Background

Engr. Raslany Mambuay belongs to the Maranao people, one of the Philippines' largest Muslim ethnolinguistic groups predominantly based in the Lanao provinces of Mindanao. His professional journey reflects a conscious effort to pursue excellence across multiple disciplines while maintaining strong connections to his cultural and religious identity. As a member of the Maranao community, he has actively worked to increase representation and visibility of Muslim professionals in mainstream Filipino civic organizations, particularly in Metro Manila's leadership circles. His career trajectory demonstrates how technical competence, cultural authenticity, and inclusive leadership can coexist and mutually reinforce one another in contemporary Philippine professional life.

Education

Mambuay's educational background reflects a progressive expansion from engineering fundamentals to public administration and legal studies, positioning him at the intersection of technical practice, governance, and law.

Undergraduate Studies

He earned his **Bachelor of Science in Electrical Engineering** from **Rizal Technological University** (RTU), where he distinguished himself not only academically but also through pioneering student leadership. At RTU, he became the university's first Maranao board member of the RTU Supreme Student Council, marking an important milestone for Mindanao Muslim representation in the institution's student governance structure. This early leadership experience would prove foundational to his subsequent civic and professional trajectory.

Graduate and Professional Studies

Building on his engineering foundation, Mambuay pursued a **Master of Public Administration** at the **University of Perpetual Help System DALTA**, with one semester remaining toward completion. This graduate program reflects his strategic interest in understanding governance frameworks, public policy development, and institutional management—competencies increasingly relevant to senior engineering leadership and public sector engagement.

Currently, he is a second-year **Juris Doctor** student at the **University of Nueva Caceres**, undertaking legal education while maintaining active professional practice and civic leadership responsibilities. This pursuit of legal training signals a long-term professional vision that integrates engineering expertise with legal literacy, potentially positioning him for specialized practice in infrastructure law, environmental compliance, energy regulation, or public-private partnerships.

Professional Career

Mambuay's professional trajectory spans diverse sectors including fast-moving consumer goods, construction, and industrial solutions, with progressive advancement through technical and managerial roles.

Engr. Raslany Mambuay

Nationality	Filipino
Ethnicity	Maranao
Education	**Juris Doctor** (pursuing) University of Nueva Caceres **Master of Public Administration** University of Perpetual Help System DALTA **Bachelor of Science in Electrical Engineering** Rizal Technological University
Occupation	Electrical Engineer Project Manager Civic Leader
Known for	First Muslim President of Rotaract Club of Manila Metro Overall Most Outstanding President (District 3810) Multi-credentialed engineering professional
Professional credentials	REE, CEM, CEA, SO2, PCO, LFA

Early Career

His professional journey began at **Unilever**, one of the world's leading consumer goods companies, where he served as a **Project Engineer**. In this capacity, he gained exposure to large-scale manufacturing operations, process optimization, and the integration of electrical systems within complex production environments. This experience in a multinational corporate setting provided him with foundational project management skills and an understanding of global engineering standards.

He subsequently joined **Xing Solutions Corporation** as a **Direct Manager Assistant**, expanding his competencies beyond pure engineering toward organizational management and strategic coordination.

Infrastructure and Construction Leadership

Mambuay's career took a significant step forward when he assumed the role of **Area Project Manager** at **Unimax Steel Structure and Construction Corporation**. In this position, he managed multiple construction sites simultaneously, overseeing electrical installations, safety protocols, and project delivery within tight timelines and budget constraints. This role demanded integration of technical engineering knowledge with contractor coordination, regulatory compliance, and stakeholder management.

Current Position

Currently, he serves as **Project Manager** at **Lead Tech Industrial Solutions Corporation**, where he oversees comprehensive project lifecycles from design and procurement through installation, commissioning, and client handover. His role involves coordinating multidisciplinary teams, ensuring adherence to electrical codes and safety standards, managing energy efficiency initiatives, and maintaining environmental compliance across industrial installations.

Professional Credentials

Mambuay holds an exceptional array of professional certifications that distinguish him within the Philippine engineering community:

- **Registered Electrical Engineer (REE)** – licensed by the Professional Regulation Commission to practice electrical engineering in the Philippines
- **Certified Energy Manager (CEM)** – recognized expertise in energy management systems and efficiency optimization
- **Certified Energy Auditor (CEA)** – qualified to conduct comprehensive energy audits and recommend conservation measures
- **Safety Officer 2 (SO2)** – certified under Department of Labor and Employment regulations to implement occupational safety and health programs
- **Pollution Control Officer (PCO)** – authorized to manage environmental compliance and pollution prevention systems
- **Licensed Financial Advisor (LFA)** – qualified to provide financial planning and advisory services

This combination of credentials reflects a holistic approach to professional development, integrating technical engineering with safety, environmental stewardship, energy sustainability, and financial planning.

Leadership and Civic Engagement

Beyond his professional engineering practice, Mambuay has demonstrated transformative leadership in civic organizations, particularly within the Rotary movement.

Rotaract Club of Manila Metro

In **2022-2023**, Mambuay served as **President of the Rotaract Club of Manila Metro**, making history as the organization's first Muslim president. His presidency was characterized by exceptional performance across multiple service dimensions, culminating in unprecedented recognition at the district level.

At the **District Conference and Grand Appreciation Night 2023**, the club under his leadership received the following awards:

- **Overall Most Outstanding President** (awarded to Engr. Raslany Mambuay) – District 3810, out of more than 60 club presidents
- **Public Image Award** – Platinum Distinction
- **Professional Development Award** – Platinum Distinction
- **International Service Award** – Platinum Distinction
- **Club Service Award** – Platinum Distinction
- **Community Service Award** – Platinum Distinction
- **District Affairs Award** – Platinum Distinction
- **Disaster Risk Reduction Citation** – Platinum Distinction
- **Outstanding Flagship Project** – Metro Cares
- **Excellence in Fundraising Award** – Bronze Distinction
- **Leadership Excellence Award** – PLP Raslany Mambuay

This extraordinary recognition across nearly all award categories reflects comprehensive organizational excellence and Mambuay's capacity to mobilize volunteers, implement high-impact projects, and build institutional culture during his presidential year. The "Imagine Rotary" year under his leadership set new standards for the club's service delivery and organizational effectiveness.

Rotary Club of Tondo Metro

Mambuay's leadership within the Rotary movement continues with his upcoming service as **Vice President of the Rotary Club of Tondo Metro** for the **2026-2027** term. This appointment represents progression from youth Rotaract leadership to senior Rotary responsibilities, positioning him for potential district-level roles in the coming years.

Youth Leadership Training

He has completed the **Youth Leadership Program**, earning a **Light Blue Cord** designation with merit certificate recognition, reflecting his investment in continuous leadership development and mentorship capacity.

Institutional Contributions

Mambuay's contributions extend beyond individual achievement to institutional impact across several dimensions.

Representation and Inclusion

As the first Maranao student leader at RTU and the first Muslim president of Rotaract Club of Manila Metro, Mambuay has opened pathways for greater Mindanao Muslim participation in mainstream Filipino civic and professional organizations. His success challenges stereotypes and demonstrates that leadership excellence can emerge from any cultural or religious background when talent is recognized and nurtured.

Service Innovation

During his Rotaract presidency, the "Metro Cares" flagship project addressed critical community needs while mobilizing youth volunteers toward sustainable service models. His emphasis on disaster risk reduction earned platinum distinction, reflecting attention to resilience-building in a disaster-prone nation.

Professional Standards

Through his accumulation of multiple professional credentials and commitment to continuing education, Mambuay models the importance of lifelong learning and multidisciplinary competence for engineering professionals navigating increasingly complex technical and regulatory environments.

Legacy and Recognition

Mambuay's legacy is being built on several foundations: technical excellence in electrical engineering and energy management; transformative civic leadership within the Rotary movement; and pioneering representation as a Maranao Muslim professional in Metro Manila's organizational landscape.

His recognition as Overall Most Outstanding President among more than 60 peers in District 3810 stands as a defining achievement, demonstrating that cultural and religious identity can coexist with—and even enhance—leadership effectiveness in pluralistic settings.

The platinum-level distinctions across nearly all service categories during his presidential year establish benchmarks for future club leaders and demonstrate how focused leadership can elevate organizational performance across multiple dimensions simultaneously.

His ongoing legal studies suggest a future legacy that may extend beyond engineering practice toward policy advocacy, regulatory development, or public sector leadership where technical expertise and legal literacy converge.

Current Pursuits and Future Trajectory

Mambuay currently balances multiple professional and educational commitments: full-time project management responsibilities at Lead Tech Industrial Solutions Corporation, second-year law studies at the University of Nueva Caceres, near-completion of his Master of Public Administration degree, and upcoming vice-presidential duties with the Rotary Club of Tondo Metro.

This demanding portfolio reflects an individual comfortable with complexity and committed to continuous growth across technical, legal, and civic domains.

His trajectory suggests potential future roles in infrastructure development, public-private partnerships, energy policy, or public sector leadership positions where engineering expertise, legal knowledge, and proven civic leadership can be leveraged for broader institutional impact.
