Minerva-Saminah Mambuay Naga

Minerva-Saminah Mambuay Naga, commonly known as **Dr. Naga**, is a Filipino educator, academic administrator, and researcher who currently serves as the **Vice President for Academic Affairs** (in Concurrent Capacity) of the Mindanao State University (MSU) System, one of the largest and most culturally significant state university systems in Mindanao.<ref name="msugensan2025">Mindanao State University Marawi City. (2025, December 12). *Dr. Minerva-Saminah M. Naga, Vice President for Academic Affairs.* MSU Marawi City. Retrieved from https://msugensan.edu.ph/dr-minerva-saminah-m-naga-new-vice-president-for-academic-affairs/</ref>

She built her career entirely within the MSU system, rising from classroom teacher to the highest academic policy post in a university network that serves over 69,000 students across Mindanao, Sulu, and Palawan. Before her elevation to the system-wide VPAA role, she served as Dean of the College of Education at MSU-Marawi and as Vice Chancellor for Academic Affairs at MSU-Marawi.<ref name="msumain">Mindanao State University Main Campus. (n.d.). *Personnel Profile: Minerva-Saminah M. Naga.* Office of the Dean, College of Education, MSU Main Campus. Retrieved from https://www.msumain.edu.ph/personnel/minerva-saminah-m-naga/</ref>

Her career is best understood through one thread that runs from her earliest classroom work all the way to the top of the MSU system: a determination to make quality education meaningful for Meranaw and Bangsamoro learners, not just adequate. She navigated an AusAID scholarship to the University of Melbourne, survived the administrative crisis that followed the 2017 Battle of Marawi, and helped steer MSU through the pandemic-era shift to flexible learning, all while staying rooted in the cultural and spiritual soil of Lake Lanao.

Background

Growing Up in Meranaw Country

Minerva-Saminah Mambuay Naga grew up in the cultural heartland of the Meranaw people, the communities surrounding Lake Lanao in the province of Lanao del Sur in central Mindanao. Biographical and Professional Study: Dr. Minerva-Saminah Mambuay Naga. (n.d.). Unpublished institutional document. The Meranaw are one of the largest Islamic ethno-linguistic groups in the Philippines, known for a rich tradition of scholarship, craftsmanship, and a deeply held cultural code called *maratabat*, which ties personal and family honor to excellence in conduct and achievement.

Growing up within that culture meant that pursuing higher education wasn't simply a career choice. It carried the weight of family and community expectations. For a woman aspiring to academic leadership in a traditionally structured society, the path required not just intelligence but persistence. What makes Naga's trajectory particularly striking is that she chose to channel that drive into education itself, making the improvement of teaching and learning her life's work rather than simply climbing out of her community.

Her full name reflects both her Meranaw heritage and her interfaith identity. The name "Saminah" is of Arabic origin and is commonly used among Muslim Filipinos, while "Minerva," drawn from Roman tradition, signals a family that was comfortable bridging worlds, an instinct she'd carry into her professional life as a bridge-builder between global educational standards and local Bangsamoro realities.

Dr. Minerva-Saminah Mambuay Naga	
Nationality	Filipino
Education	B.S. Home Economics (1997), Mindanao State University, Marawi M.A. in Education, major in Reading (2004), Mindanao State University, Marawi Master of Assessment and Evaluation (2008), University of Melbourne, Australia Ph.D. in Educational Administration (2015), Central Mindanao University, Bukidnon
Occupation	Academic administrator; University professor; Researcher
Known for	Post-Marawi Siege academic recovery; outcomes-based education reform; peace education advocacy in the Bangsamoro
Employer	Mindanao State University System
Current title	Vice Chancellor for Academic Affairs, MSU-Marawi; Vice President for Academic Affairs (Concurrent Capacity), MSU System
Previous titles	Dean, College of Education, MSU-Marawi; Director of Admissions, MSU-Marawi

Education

Undergraduate Studies

Naga completed her Bachelor of Science in Home Economics at Mindanao State University in Marawi City in April 1997. Her undergraduate thesis, titled "A Survey in Iodized Salt Awareness and Utilization: MSU-ILS Preschoolers' Parents," gave her an early grounding in community-based research and household dynamics. Home Economics at MSU-Marawi was, and remains, a discipline with strong community extension dimensions, so Naga's undergraduate years weren't spent entirely in lecture halls. They gave her a practical sense of how families and communities actually function, knowledge that would later shape how she thought about education policy.

Early International Exposure

Before she ever finished her doctorate, Naga had already begun building an international perspective on education. In April and May 2005, she joined the Philippines-Australia BEAM (Basic Education Assistance for Mindanao) Teacher Educators Training and Study Tour as a Visiting Scholar at the University of South Australia (UniSA) in Adelaide. That short but consequential tour introduced her to Australian frameworks for teacher education at a time when the Philippine Department of Education was actively reshaping the madrasah and public school curriculum in Muslim Mindanao. Coming back from Adelaide with fresh eyes on how teacher preparation programs are designed would matter enormously later, when she eventually sat in the Dean's office overseeing the preparation of future teachers herself.

Master of Assessment and Evaluation, University of Melbourne

The bigger international turning point came in January 2007, when Naga was selected as an AusAID-PAHRDF (Philippines-Australia Human Resource Development Facility) long-term training scholar through the MSU Academic Professional Development Program (APDP).<ref name="msumain" /> She spent a year and a half, from January 2007 to August 2008, at the University of Melbourne in Victoria, Australia, completing a **Master of Assessment and Evaluation**.<ref name="msumain" />

The Melbourne years were formative in ways that went beyond coursework. She was immersed in one of the world's leading educational research environments at a time when outcomes-based approaches to assessment were gaining momentum globally. She returned to MSU-Marawi in 2008 not just with a degree but with a methodological toolkit and a vocabulary for reforming how student learning gets measured. That Melbourne experience became the intellectual engine behind much of her later research and her advocacy for outcomes-based education in Philippine higher education institutions.

She had earlier completed her **Master of Arts in Education** with a major in Reading at Mindanao State University in Marawi in April 2004, before the Melbourne scholarship.<ref name="msumain" /> The Reading specialization gave her a concrete understanding of foundational literacy, a background that proved directly useful years later when she was designing post-conflict literacy recovery programs for communities displaced by the Marawi Siege.

Doctoral Research

Naga completed her **Doctor of Philosophy in Educational Administration** at Central Mindanao University (CMU) in Musuan, Bukidnon, in March 2015, supported by a grant from the MSU Academic Professional Development Program.<ref name="msumain" /> Her doctoral dissertation focused on outcomes-based evaluation of classroom assessment competencies in higher education institutions, directly tying together the threads of her

Melbourne training and her practical experience as a faculty member at MSU-Marawi.<ref name="docbio" /> The research asked a straightforward but urgent question: are college teachers actually competent to assess student learning in ways that align with the outcomes their programs promise? The findings had direct policy implications for how MSU and similar institutions train and evaluate their teaching faculty.

Career

Early Faculty Life and Peace Education Work

Naga joined the faculty of the College of Education at MSU-Marawi in the years following her undergraduate completion in 1997. Her teaching areas spanned educational administration, assessment and evaluation, reading education, home economics, pre-service practicum supervision, and pedagogical strategies with a focus on educational technology, as well as peace education integration.<ref name="msumain" /> That last specialization, peace education, took on particular significance given the recurring cycles of armed conflict that have marked life in Lanao del Sur and greater Mindanao.

She began documenting peace-related forums and dialogue sessions in the early 2000s. In 2009, she participated in the National Conference on Secondary Arabic Language and Islamic Values Education (ALIVE) and the Standard Madrasah Curriculum (SMC), organized by the DepEd Bureau of Madrasah Education.<ref name="msumain" /> In 2010, she documented the Consultative Meeting on the MSU Peace Education Module Exemplars and Strategic Planning Workshop, a project of MSU-IPDM under the UN ACT for Peace Programme Partnership.<ref name="msumain" /> These weren't just resume entries. They reflected a genuine investment in the peace architecture of Mindanao at a time when formal peace negotiations between the Philippine government and the Moro Islamic Liberation Front (MILF) were slowly gaining ground.

Documenting the Framework Agreement on the Bangsamoro

In December 2012, Naga served as documenter for the two-day Forum on the Basic Understanding and Popularization of the Framework Agreement on the Bangsamoro (FAB), organized by the Consortium of Bangsamoro Civil Society (CBCS-Ranaw) in Marawi City.<ref name="msumain" /> The FAB, signed in October 2012, was a landmark peace accord that would eventually lead to the creation of the Bangsamoro Autonomous Region in Muslim Mindanao (BARMM). Being in the room for those community-level discussions, and being the one responsible for accurately recording what was said, gave Naga a ground-floor perspective on how peace agreements are received, debated, and processed by ordinary educators and community members. In 2012, she also documented a Teachers' Forum on Interfaith Dialogue, again under CBCS-Ranaw.<ref name="msumain" />

In 2016, she was involved in the My Lake Lanao Project, a participant teachers' training organized by the Embassy of the United States in Manila in partnership with MSU-IIT and the MSU College of Education Extension Services.<ref name="msumain" /> The project centered on environmental advocacy and community engagement around Lake Lanao, connecting teachers to both ecological and cultural stewardship.

Director of Admissions, MSU-Marawi

From 2016 to 2021, Naga served as Director of the Office of Admissions at MSU Main Campus in Marawi City, concurrently serving as a Special Assistant in the Office of the Vice President for Academic Affairs at the system level.<ref name="msumainadmissions">Office of Admissions, MSU Main Campus. (n.d.). *Admissions Directors.*

Retrieved from https://www.msumain.edu.ph/admissionsoffice/</ref> The Admissions Directorship put her at the front door of the entire university, overseeing the processes by which thousands of students from across the Bangsamoro and wider Mindanao entered MSU's academic community every year.

Her five years in Admissions (2016 to 2021) overlapped directly with the catastrophic Battle of Marawi in 2017, one of the most devastating urban conflicts in recent Philippine history. Managing student enrollment and records continuity while the city was under siege and the campus evacuated its population was not a theoretical administrative challenge. It was a crisis that required improvisation, coordination with displaced faculty and students, and a steady hand during institutional chaos.

Post-Siege Recovery and the "3Rs" Initiative

The Battle of Marawi, which began in May 2017, forced the temporary closure of the MSU campus and displaced tens of thousands of Marawi residents.<ref name="wikipedia_msu">Wikipedia contributors. (2025). *Mindanao State University.* Wikipedia, The Free Encyclopedia. Retrieved from https://en.wikipedia.org/wiki/Mindanao_State_University</ref> For the College of Education, the siege created an acute educational emergency: an entire generation of students in Lanao del Sur had their schooling disrupted, and the learning losses were deep.

In August 2017, even as the conflict was still ongoing, Naga was among the contributors to the Marawi City Education Master Plan, which formed part of the Recovery, Rehabilitation, and Reconstruction Plan for 2017 onwards, commissioned by the City Government of Marawi.<ref name="msumain" /> The same month saw the Multi-Stakeholders Forum for Lanao del Sur, co-organized with Task Force Bangon Marawi and the National Economic and Development Authority, where she served as documenter.<ref name="msumain" />

In the years that followed, Naga became instrumental in the "3Rs" (Reading, Writing, and Arithmetic) recovery initiatives, designed specifically to diagnose and address the learning gaps that accumulated in Lanao del Sur I during and after the siege.<ref name="docbio" /> This wasn't just a matter of going back to basics. It involved systematically mapping which competencies had been lost, identifying which student populations were most affected, and designing a Curricular Development Plan that could realistically bridge those gaps given the emotional and logistical weight students and teachers were carrying. The recovery work blended her expertise in reading, her Melbourne-honed assessment methodology, and her longstanding peace education sensibility.

Dean, College of Education, MSU-Marawi

Naga eventually rose to the position of **Dean of the College of Education** at MSU-Marawi, the largest and most historically rooted college in the MSU system's flagship campus.<ref name="mbhte2024">Ministry of Basic, Higher, and Technical Education, MEISO. (2024, July 31). *Director General Tahir Nalg graced the Tribute to Parents, Recognition Rites, and Hooding Ceremony for the College of Education graduates at MSU Marawi.* Retrieved from https://mbhte-meiso.bangsamoro.gov.ph/2024/07/31/</ref> As Dean, she oversaw the academic programs responsible for training the teachers who would serve the schools of the Bangsamoro and wider Mindanao. Her office was in the New Building of the College of Education on the MSU Main Campus in Marawi City.<ref name="msumain" />

Her tenure as Dean was defined by a push toward international-standard quality assurance and outcomes-based program delivery, including active engagement with the ASEAN University Network Quality Assurance (AUN-QA) framework.<ref name="docbio" /> AUN-QA is one of the most rigorous benchmarking systems in Southeast Asian higher education, and working toward it required the College of Education to demonstrate, with evidence, that its graduates were actually achieving the learning outcomes its programs promised. This was precisely the terrain that Naga had been preparing for since her Melbourne years.

She also led international academic missions to forge institutional partnerships. Among the notable linkages were visits to **Kastamonu University** in Turkey and **Universitas Diponegoro** in Indonesia, seeking to align early childhood and higher education frameworks at MSU with international best practices, and to place Meranaw academic leadership on a global map.<ref name="docbio" />

During her deanship, she also oversaw the navigation of the COVID-19 pandemic and the shift to flexible and online learning modalities, a transition that required not just technology adoption but a compassionate rethinking of how assessment and instruction work when students are learning from homes in communities with limited internet access.

Vice Chancellor for Academic Affairs, MSU-Marawi

After her service as Dean at MSU-Marawi, Naga was appointed **Vice Chancellor for Academic Affairs** at MSU-Marawi City, the largest constituent universities of the MSU System located in Lanao del Sur.<ref name="msugensan2025" /> As VCAA, she was the chief academic officer of Marawi campus. The posting demonstrated the confidence the MSU system's leadership placed in her cross-campus versatility.

It was during her tenure as VCAA that the Turkish Cooperation and Coordination Agency (TİKA) engaged with MSU officials to discuss joint initiatives on medical education, with Naga representing the university in those discussions.<ref name="tika">TİKA Philippines. (n.d.). [Post on joint initiatives with MSU officials]. X (formerly Twitter). Retrieved from https://x.com/tikaphilippines/status/1986300694547341522</ref> This was part of a broader pattern of her career: leveraging international partnerships not as prestige exercises but as mechanisms for genuinely improving what MSU campuses can offer their students.

Vice President for Academic Affairs, MSU System

In December 2025, Naga was designated as the **Vice President for Academic Affairs** of the Mindanao State University System in a concurrent capacity, while retaining her VCAA position at MSU-General Santos.<ref name="msugensan2025" /> The VPAA is the highest academic policy position in the MSU System, responsible for setting the direction of curriculum, quality assurance, and academic standards across all eight constituent universities and three constituent colleges of the network.

> "May you continue to lead with wisdom and dedication in advancing quality education and transformative service for Mindanao."<ref name="msugensan2025" />

This congratulatory message from the MSU-General Santos community at the time of her designation captures the esteem in which she is held across the system. Her elevation to the VPAA role marks the culmination of a career built entirely within MSU, from undergraduate student to the person now responsible for shaping the academic life of over 69,000 students across Mindanao, Sulu, and Palawan.

Contributions and Advocacy

Outcomes-Based Education and Assessment Reform

If there is one intellectual legacy that defines Naga's academic career, it's her sustained push to make assessment meaningful rather than just procedural. Her doctoral research at Central Mindanao University examined whether college faculty in higher education institutions were genuinely competent to assess student learning in alignment

with outcomes-based frameworks.<ref name="docbio" /> This was a pointed question, because the shift to outcomes-based education (OBE) in the Philippines had been mandated by the Commission on Higher Education but wasn't always implemented with rigor.

Her Melbourne training gave her the theoretical and methodological grounding to distinguish between assessment that merely documents student performance and assessment that actually informs teaching and improves learning. She brought that distinction back to MSU and tried to build it into faculty development, curriculum review, and program evaluation processes. This contribution is less visible than a policy announcement but more durable: it shapes how individual faculty members think about what they're measuring and why.

Post-Conflict Academic Recovery

Naga's involvement in the post-Marawi Siege recovery efforts represents one of the most concrete public services of her career. Contributing to the Marawi City Education Master Plan in 2017, designing the "3Rs" learning recovery initiatives for Lanao del Sur I, and working through the Multi-Stakeholders Forum with national and local government bodies, she helped ensure that the educational consequences of the siege were taken seriously as policy problems and not just humanitarian footnotes.<ref name="msumain" /><ref name="docbio" />

The population displacement caused by the battle didn't just interrupt schooling for a few months. It scattered families, traumatized students and teachers, and disrupted academic records. The interventions Naga helped architect addressed not just what students had missed but how the system could rebuild enough trust and stability to make learning possible again in a post-conflict context.

Peace Education Integration

Naga has been a consistent voice for integrating peace education into the formal curriculum at all levels, from pre-service teacher preparation to in-service faculty development.<ref name="msumain" /><ref name="docbio" /> This isn't a peripheral interest. In a region where armed conflict has periodically reshaped the educational landscape, training teachers to facilitate peace-oriented dialogue in their classrooms is as practical as teaching them literacy instruction methodology.

Her documented involvement in peace education forums spans from 2009 to 2018, covering the National Conference on Secondary Arabic Language and Islamic Values Education (ALIVE), the UN ACT for Peace Programme's MSU Peace Education Module workshops, the community-level popularization of the Framework Agreement on the Bangsamoro, and interfaith dialogue sessions for teachers.<ref name="msumain" /> This body of work positions her not as a detached academic observer of peace processes but as an active participant in building the civic and pedagogical infrastructure that makes sustainable peace more likely.

Research on the Bangsamoro Education Landscape

Naga's research portfolio covers three overlapping themes: educational administration and school leadership, assessment and outcomes-based evaluation, and the socio-economic and professional context of educators and communities in the Bangsamoro.

Her collaborative publications include a 2024 study on school principals' experiences implementing School Improvement Plans in Lanao del Sur, published in *Education Quarterly Reviews*;<ref name="balindong2024">Balindong, N. A., Naga, M. M., et al. (2024). The experiences of the school principals on the implementation of the School Improvement Plan (SIP) in Lanao del Sur. *Education Quarterly Reviews, 7*(1). </ref> a 2024 qualitative study on how MBHTE-BARMM supervisors balance work-life responsibilities;<ref

name="datumaas2024">Datumaas, N. M., Naga, M. M., et al. (2024). A qualitative study on MBHTE-BARMM supervisors' approaches to achieving work-life responsibilities. *Education Quarterly Reviews, 7*(1).</ref> and a 2025 study on the perceived effectiveness of In-Service Training (INSET) programs as a basis for an INSET manual, published in the *International Journal of Research and Innovation in Social Science (IJRISS)*.<ref name="mangoda2025">Mangoda, N. S., Naga, M. M., et al. (2025). Perceived effectiveness of In-Service Training (INSET) programs: Basis for an INSET manual. *IJRISS, 9*(10).</ref>

Her doctoral dissertation itself, completed in 2015, remains a reference point for researchers examining outcomes-based evaluation in Philippine higher education:<ref name="naga2015">Naga, M. M. (2015). *Outcomes-based evaluation on classroom assessment competencies in higher education institutions* (Doctoral dissertation). Central Mindanao University, Musuan, Bukidnon.</ref>

Faith-Integration as a Protective Factor

One of the less widely cited but meaningful dimensions of Naga's research involves the intersection of professional identity and religious practice among educators in the Bangsamoro. Her work has explored how faith-integration, specifically the sense of vocation and ethical grounding that comes from Islamic practice, functions as a protective and stabilizing factor for the well-being of Muslim educators working in high-stress environments like post-conflict schools.<ref name="docbio" /> This is a distinctive contribution to a literature that often treats religiosity and professional performance as separate domains.

International Academic Linkages

Naga has personally led or participated in high-level academic delegation visits to partner institutions abroad, including **Kastamonu University** in Turkey and **Universitas Diponegoro** in Semarang, Indonesia.<ref name="docbio" /> These visits were aimed at benchmarking MSU's early childhood and higher education programs against international frameworks and building institutional agreements that could support faculty exchange, collaborative research, and curriculum development. The Turkey connection also reflects MSU's historical and religious ties with the broader Turkic and OIC world, given Marawi's significance as a center of Islamic scholarship in Southeast Asia.

Institutional Quality Assurance

Naga has been actively involved in the **ASEAN University Network Quality Assurance** (AUN-QA) processes within MSU, which involve rigorous peer review of academic programs, learning outcomes, curriculum design, faculty qualifications, and student support systems.<ref name="docbio" /> AUN-QA membership and compliance is a significant institutional marker in Southeast Asian higher education, and her sustained work in this area has contributed to pushing MSU's programs toward regional benchmarks. The pursuit of AUN-QA accreditation is not just about prestige; it's about giving MSU graduates credentials that are recognized and respected across the ASEAN region.

Legacy

Dr. Naga's career is, at its core, a story about what it means to serve an institution and a people simultaneously. Every administrative role she took on, from Admissions Director to Dean to VCAA and VPAA, was filled during a period of significant institutional stress. The Marawi Siege, the post-conflict recovery, the pandemic, the shift to flexible learning: she navigated all of these not as external disruptions to her career but as the actual substance of her work.

What she leaves behind at each level is a more rigorous, more outward-looking, and more culturally grounded approach to academic management. She showed that it's possible to hold global standards (Melbourne-trained, AUN-QA oriented, outcomes-based) and local rootedness (Meranaw identity, peace education, community research) in the same professional life without compromising either.

For future Bangsamoro educators, particularly women aspiring to academic leadership, her ascent from a Home Economics undergraduate at MSU-Marawi to the Vice President for Academic Affairs of the entire MSU System is a concrete proof of what that path can look like.

Recognition

Naga's contributions have been recognized at various institutional levels. The MSU community formally congratulated her on her designation as system-wide Vice President for Academic Affairs in December 2025, with the university describing her leadership as distinguished by wisdom and dedication to quality education and transformative service for Mindanao.<ref name="msugensan2025" /> Her selection as an AusAID-PAHRDF scholar in 2006 was itself a competitive award, reflecting recognition of her academic potential at the national and binational level.<ref name="msumain" />

She has been acknowledged by external government bodies, including the Bangsamoro Ministry of Basic, Higher, and Technical Education (MBHTE), at official recognition ceremonies for College of Education graduates under her deanship.<ref name="mbhte2024" /> Her research work has been published in peer-reviewed journals including *Education Quarterly Reviews* and the *International Journal of Research and Innovation in Social Science (IJRISS)*.<ref name="mangoda2025" /><ref name="balindong2024" />

Challenges

Naga's career unfolded in one of the most persistently difficult educational environments in the Philippines. The Bangsamoro region has historically suffered from underinvestment in public education, recurring armed conflict, high poverty rates, and geographic isolation. Serving as an academic administrator in Marawi during and after the 2017 siege meant managing institutional survival alongside strategic development, with very little margin for error.

As a woman in a leadership role in a society that maintains traditional gender hierarchies, her rise to the deanship and then to system-level leadership was itself a navigation of cultural terrain that not all institutional contexts in the Bangsamoro would have supported easily. The documentation available does not detail the specific internal resistance or challenges she may have faced along the way, but the cultural context makes clear that her ascent was not simply the product of credentials alone.

The broader challenge she continues to face, now as VPAA of the entire MSU System, is the tension between the system's mandate to serve the Bangsamoro and Muslim Mindanao on their own cultural terms, and the pressures of national and international accreditation, standardization, and resource competition. Navigating that tension is the central task of her current role.
